To access eduroam, you will need a properly configured 802.11a/b/g/n (WiFi) compatible laptop computer or mobile device that supports WPA2 Enterprise wireless security. Most Macs manufactured in the last few years have built-in WiFi compatible wireless, branded as AirPort.

System requirements & prerequisites

- To access eduroam, you will need a properly configured 802.11a/b/g/n (WiFi) compatible laptop computer or mobile device that supports WPA2 Enterprise wireless security. Most Macs manufactured in the last few years have built-in WiFi compatible wireless, branded as AirPort.

Step 1 - Activate AirPort wireless

1. Click the AirPort icon in the top right of your Mac screen

2. Select Turn AirPort On

You need to be on campus near a UniWide wireless hotspot such as a library, computer lab or common area to configure your computer for eduroam. To access eduroam on another campus, look for the eduroam logo or the local university’s wireless service symbol as eduroam uses local wireless infrastructure.
Step 2 - Configure and connect to eduroam

3. Click the AirPort icon again

4. Select eduroam

An AirPort login window appears

5. Enter the following;
   - your \textit{z number} followed by @unsw.edu.au in the Username field (as in: z1234567@unsw.edu.au)
   - your \textit{zPass} in the Password field

6. Click OK

7. Click Show Certificate icon

8. Ensure the checkbox \textit{Always trust: radius.comms.unsw.edu.au} is ticked

9. Click Continue

10. You will then be prompted to enter your Mac admin username and password to accept the changes to the AirPort configuration

\textbf{If you change your zPass in the future - you will be prompted to re-enter it the next time you attempt to connect to eduroam}

If you have any issues or questions, please contact the IT Service Centre at itservicecentre@unsw.edu.au
